Executive Summary

During Q1 2026, the Marketing Department launched four major campaigns aimed at increasing brand awareness, generating qualified leads, and supporting revenue growth. Overall campaign engagement increased compared to the previous quarter; however, conversion rates fell below expectations. Feedback from the Sales Department indicates that many marketing-generated leads did not meet qualification criteria, resulting in lower sales efficiency.

Overall Results

Successes

- Website traffic increased by **31%** compared to Q4 2025.
- Total marketing-qualified leads (MQLs) increased by **24%**.
- Social media engagement increased by **18%**.
- The Email Re-engagement Campaign achieved the highest conversion rate (22.3%) and ROI (201%).

Areas for Improvement

Although lead volume increased, Sales reported that many leads lacked sufficient purchasing intent. Key concerns include:

- Sales accepted only **61%** of marketing-qualified leads.
- Lead conversion from marketing to closed sales declined from **14.2%** in Q4 to **10.5%** in Q1.
- Marketing and Sales continue to use different lead qualification criteria.
- Campaign success is primarily measured by lead volume rather than lead quality.

Sales Feedback

Feedback collected from Sales Managers identified several recurring issues:

- High volume of duplicate leads.
- Prospects often lacked purchasing authority.
- Incomplete customer information delayed follow-up.
- Campaign messaging occasionally differed from sales presentations, creating customer confusion.
